

PIPE ADAPTOR FERRULES

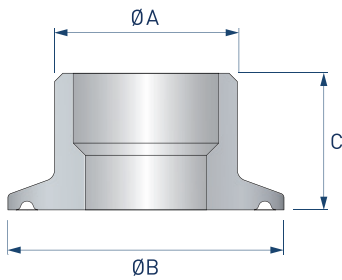

PIPE ADAPTORS

Pipe adaptor ferrules allow standard clamped components to be used in schedule piping systems. An internal machined taper ensures a smooth transition between the pipe and clamp fitting bores. Pipe adaptor ferrules are manufactured from 316L stainless steel with all surfaces finished to 0.8 microns Ra.

- I Connections** Clamp end to suit 1/2" - 2" ASME BPE fittings
Weld end to suit 1/2" - 2" Sch 10 or Sch 40 pipe
- M Material** 316L stainless steel
- S Surface Finish** All surfaces - 0.8 microns Ra
- O Options** Alternative pipe vs. tube combinations
Electropolished finish
- C Certification** Certificate of conformity
Material certification
Certified 'Animal derived ingredient' free
