

# SH-SAF-TYPE SAFETY CLAMP

## SH-SAF-TYPE

The SH-Type is a double hinge pin construction which provides a more uniform clamping pressure than single pin designs. The SH-Type is well suited to applications where harder gasket types are used. Clamps are manufactured in 316 stainless steel and are available with open wing nut, solid wing nut or hex nut.

<b>Connections</b>	To suit 1/2" - 4" ASME BPE clamp fittings
<b>Material</b>	304 stainless steel
<b>Surface Finish</b>	All surfaces - bright polish
<b>Options</b>	Various closure types Coloured wing nuts (red, blue, black, yellow, green) Machining to suit ported gaskets Machining to suit tabbed orifice plates
<b>Certification</b>	Certificate of conformity

Clamp end (ASME BPE)	Max pressure (bar @ 150°C)	ØA (mm)	ØB (mm)	ØC (mm)	D (mm)
1/2" / 3/4"	50	25	62	35	17
1" / 1-1/2"	50	50.5	92	60	17
2"	50	64	105	78	17
2-1/2"	50	77.5	125	88	17
3"	40	91	140	104	17
4"	35	119	168	132	17
