

SH-TYPE CLAMP

SH-TYPE

The SH-Type is a double hinge pin construction which provides a more uniform clamping pressure than single pin designs. The SH-Type is well suited to applications where harder gasket types are used. Clamps are manufactured in 316 stainless steel and are available with open wing nut, solid wing nut or hex nut.

Connections	To suit 1/2" - 6" ASME BPE clamp fittings
Material	304 stainless steel
Surface Finish	All surfaces - bright polish
Options	<ul style="list-style-type: none"> Various closure types Coloured wing nuts (red, blue, black, yellow, green) Double bolted design Machining to suit ported gaskets Machining to suit tabbed orifice plates
Certification	Certificate of conformity

	Clamp end (ASME BPE)	Max pressure (bar @ 150°C)	ØA (mm)	ØB (mm)	ØC (mm)	D (mm)
	1/2" / 3/4"	50	25	62	35	17
	1" / 1-1/2"	50	50.5	92	60	17
	2"	50	64	105	78	17
	2-1/2"	50	77.5	125	88	17
	3"	40	91	140	104	17
	4"	35	119	168	132	17
	6"	30	167	247	180	17
