

## Quality Policy

The policy of Staitech UK is to produce and sell products of such quality that fully satisfy existing and potential customer requirements. Thus, for all employees, cascading from myself as the business owner, quality is a key priority and an integral part of the overall company strategy.

The company operates and maintains a Quality Management System (QMS) designed to meet the needs of our customers and the business. We are currently reviewing all aspects of our QMS, and our aim is to achieve accredited certification to ISO 9001:2015 during 2023

We will ensure that the products we make, and supply have been produced safely and in accordance with all applicable statutory, legal and customer requirements.

All employees are responsible for the achievement of this and I as the business owner will ensure all aspects of the QMS, including processes, procedures, quality objectives, and risk-based thinking are known, understood, promoted, and adhered to by all my team.

Quality does not originate in the quality or technical department. It originates in the work each one of us carries out.

We will strive for continuous improvement to meet and surpass our customer's requirements regarding all aspects of our business.
